

(Monday, March 28, 2011, Andover, MA) FootBridge Staffing, a leading provider of staffing solutions in the nuclear and power industry, announced support for the American Nuclear Society's (ANS) Japanese Relief Fund which will provide financial aid to Daiichi nuclear power plant employees and their family members in Fukushima, Japan. Contribution to the organization's efforts will ensure the men and women working to control the deterioration of the plant reactors, as well as their loved ones, will be compensated for their heroic efforts.

"As a member of the ANS, FootBridge Staffing wanted to immediately join forces with our colleagues to assist those most closely affected by the devastating 9.0 magnitude earthquake and subsequent tsunami that brought catastrophe to this region of Japan on March 11, 2011," said Todd Springer, Managing Partner who prior to joining FootBridge worked for Yankee Atomic Electric at Maine Yankee in Wiscasset, Maine.

"What happened in Japan was a horrible disaster beyond comprehension. By aligning our strengths with other members of this nuclear organization we hope to accelerate the rehabilitation for all those working so hard to prevent further damage to this stricken area, while also offering financial support to rebuild." said Rich O'Donnell, Founding Partner.

FootBridge has been a member of the ANS since being founded. To make a donation or to learn more about the fund, visit the organization's Japanese Relief Fund at <http://www.new.ans.org/about/japanrelief/>.
